

Den Braven

PRESS RELEASE

Oosterhout, July 2014

Zwaluw Hybriseal® Façade flexible sealant for construction joints

The highly elastic sealant Zwaluw Hybriseal® Façade from Den Braven is the perfect new CE-certified solution for sealing expansion joints. This versatile, one-component sealant with a low modulus based on hybrid technology is suitable for all kinds of expansion and connecting joints in concrete, brickwork, masonry and, for example, for perimeters around windows and doors. Zwaluw Hybriseal® Façade is available in a wide range of colours, both in sausages of 600ml and in cartridges of 300ml.

Even without a primer, Zwaluw Hybriseal® Façade bonds well with most building materials, such as concrete, brick, painted wood, glazed surfaces, aluminium, steel, stainless steel and synthetic materials. This sealant has a high mechanical resistance, cures without any blisters and is also resistant to ageing and weathering. Den Braven supplies Zwaluw Hybriseal® Façade in the colours concrete grey, white, dark beige, light beige, RAL 7030, medium grey, dark grey, basalt and black. In anticipation of the new regulations, the sealants already have the necessary CE-certification (highest achievable class F25LM).
